Academic Year 2018/2019

1 Belief Sets

Determine $Cn(K)$ for the following K :

1. $K = \{P, Q\}$;
2. $K = \{P \vee Q, P \vee \neg Q\}$.

2 Remainder Sets

The remainder set of belief set K by a sentence A , denoted $K \perp A$, is the set of all belief subsets of K that fail to imply A .

Compute $K \perp A$ for the following cases:

1. $K = \{P, Q\}$, $A = \{P \wedge Q\}$;
2. $K = \{P \vee R, P \vee \neg R, Q \wedge S, Q \wedge \neg S\}$, $A = P \wedge Q$.

3 AGM Postulates

1. Show that postulates (K*1) to (K*5) entail the following fact: if $A \in K$, then $K * A = K$.
2. Show that $*$ is not commutative, i.e., there exist K , A , and B , such that $(K * A) * B \neq (K * B) * A$.
